Profile Snapshot

Dynamic IT Operations Analyst with 9 years of expertise in Cloud Infrastructure support and System administration across Exchange Online, SharePoint Online, OneDrive for Business, Copilot 365, Entra ID, Teams, and OneDrive. Adept at streamlining IT operations, enhancing security, and driving automation for organizational efficiency. Proven ability to build strong stakeholder relationships, lead cross-functional initiatives, and deliver strategic solutions with exceptional organizational and communication skills.

Technology Stack and Core Competencies

Troubleshooting Tools: DNS Zone Audit (DZA) | MX Toolbox | Digweb Interface.

Analysis Tools: Assist 365 | MRCA | SARA.

Server Administration: Windows Server OS 2022 | Windows Server OS 2025

Ticketing Tools: Microsoft DFM WorkSpace | ServiceNow | AutoTask | Fresh Service

AI Tools: Bing AI | Copilot Studio | M365 Copilot | Gemini AI | Claude AI

AI Governance: Credo AI | Holistic AI | Microsoft Purview - DSPM for AI

Remote Support Tools: Microsoft Quick Assist | Any Desk | TeamViewer | Bomgar | ConnectWise

Web Technologies: WordPress | WHM cPanel | Plesk Obsidian | IIS | Apache Web Server

DaaS Platforms: Omnisia Horizon 8 with VMware vSphere | Windows 365 | Azure Virtual Desktop | Amazon Workspaces

Cloud Platforms: AWS | Microsoft 365 | Azure AD / Entra ID | Exchange Online | SharePoint Online | Microsoft Teams

Identity & Access: Conditional Access | Zero Trust Architecture | Privileged Identity Management (PIM) | Identity Governance | MFA | SSPR | Passwordless

Security & Compliance: SSL Certificates | Exchange online Protection & Defender for Office 365 | SPF / DKIM / DMARC | Safe Links | Safe Attachments | Purview eDiscovery | Litigation Hold | DLP

Scripting & Automation: PowerShell SDK | ExchangeOnlineManagement Shell | Microsoft Graph PowerShell | MSOnline | Azure DevOps

Professional Experience

ThoughtFocus IT

Lead Systems Engineer: M365 and Entra ID

January 2025- Present

Hyderabad, India

- Microsoft 365 & Entra ID Administration - Manage identity and access solutions, ensuring seamless authentication, security, and compliance across **M365** and **Entra ID**.
- Microsoft Azure Administration – Managed, Service Principal Name, Azure Resource Group Management, Billing and identity and access solutions, ensuring seamless SSO for authentication, Azure App Registration and Enterprise Application Requests, Maintaining SAML certificates for SSO.
- M365 Copilot Administration: Administered **Copilot** licensing and Agent Builder issues, ensuring seamless AI adoption and compliance. Defined AI use policies and integrated Copilot with M365 productivity apps to enhance collaboration. Configured and supported Copilot Studio (formerly Power Agents) to deliver tailored automation and business solutions.
- Omnisia Horizon & VMware Virtualization: Provisioning Virtual machines on **vCentre** where different **ESXi** are managed across different regions, Administering VDI's using Omnisia VDI's using Horizon Console and providing remote technical support in the form of Tickets that came on Service Now.
- AWS WorkSpaces: Provisioning, Handling end user issues, Deprovisioning of VDI resources hosted on Amazon.
- Azure Virtual Desktop: Managing AVDs, Performance issues, Application installation, Storage and Backup, Profile Management, etc.
- ServiceNow Ticketing & IT Support - Handle incident management, service requests, and problem resolution using ServiceNow, ensuring efficient IT operations and user support.
- Cisco DUO Administration – Handling **Duo Enrollment**, Directory Sync with Entra ID, Duo Lockout, SSO for Enterprise Apps.
- Optimized cloud productivity through effective **OneDrive** governance—configured sharing policies, monitored storage usage, and enabled seamless sync across user endpoints.
- Facilitated cross-functional communication using Microsoft Teams Online—created custom channels, implemented notification workflows, and integrated apps for enhanced team operations.
- Enforced compliance and data security by leveraging Microsoft 365 admin centre features to audit **OneDrive/SharePoint** activities and apply Teams retention policies.
- Enforced compliance and Engineered 30+ automation scripts across ExchangeOnlineManagement, AzureAD, and MSONline modules - saving 10+ hrs/week and cutting bulk-operation errors by 80%.
- Intune MDM: Administered mobile device management policies, ensuring secure enrollment, configuration, and lifecycle management across enterprise endpoints.
- Intune MAM: Implemented mobile application management strategies, enabling secure app deployment, conditional access, and data protection without impacting user productivity.

Infosys India Limited

Sr. M365 Administrator

March 2024- December 2024

Hyderabad, India

- Managed email services using Exchange Online, configuring mailboxes, distribution groups, and mail flow rules.
- Created and managed Microsoft Teams environments, including channel creation, collaboration features, and user management.
- Supported end-users with technical troubleshooting and provided guidance for MS Office suite issues, optimizing performance and user experience.
- During Support used **Bing AI / Microsoft Copilot** for expediting the resolution of tickets and enhancing technical skills.
- Implemented security protocols such as Multi-Factor Authentication (MFA), Conditional Access, and Data Loss Prevention (DLP) for the organization's security compliance.
- Administered Omnisia Horizon with VMware vSphere and Windows Virtual Desktop and Windows 365 Cloud PC environments to deliver secure, scalable, and cloud-based desktop experiences. Oversaw deployment, configuration, and performance optimization for enterprise workloads. Ensured compliance, user access control, and seamless troubleshooting to maintain operational efficiency.
- Managed Intune MDM by securely enrolling and configuring enterprise devices throughout their lifecycle. I have implemented Intune MAM to deploy and protect corporate apps while maintaining user productivity. I have enforced device compliance policies integrated with Conditional Access, ensuring secure access and streamlined remediation.
- Performed migration tasks from on-premises Exchange to Exchange Online, ensuring minimal downtime and data loss.
- Used PowerShell scripting for automating regular administrative tasks such as user provisioning, license assignment, and reporting.

Genpact India Private Limited

Process Developer

June 2022-October 2023

Hyderabad, India

- Resolved advanced Azure Infrastructure, Azure AD Sync issues, MFA, conditional access, and optimizing collaboration and communication.
- Managed large-scale Exchange online and OnPrem environments, enhancing mail flow efficiency.
- Configured Outlook, OWA, and analyzed logs for effective issue resolution. Contributed to Exchange deployment in clustered environments.
- Exchange Online Protection & Defender: Configured anti-spam, anti-phishing, Safe Links, and Safe Attachments for 1,000+ user tenants - reducing phishing incidents by 70% and turning EOP to eliminate false positives on business-critical mail flows.
- Managed VMware Horizon environments to deliver secure, scalable, and high-performance virtual desktops. Oversaw VDI infrastructure provisioning, patching, and optimization across enterprise workloads. Ensured compliance and efficiency through access policies, monitoring, and advanced troubleshooting.
- Proficiently managed Backup Applications for Azure Active Directory and Exchange.

Interglobe Aviation Limited.

IT Support Executive

April 2018-February 2022

Hyderabad, India

- Exchange Online Mailbox & Mail Flow: Administered 1,200+ mailboxes across hybrid and cloud-only tenants - managing quotas, archive policies, litigation hold, MRM, transport rules, connectors, and outbound delivery failures for multi-domain enterprise tenants.
- SharePoint Online Administration & Migration: Managed 500+ SPO site collections - permissions, external sharing, hub sites, and broken inheritance. Supported SPMT-based on-prem to SPO migrations with metadata preservation and zero data loss across 10+ engagements. Experienced in Exchange server upgrading, transitioning, and migrating Exchange to the latest Exchange Version or Exchange online.
- Maintained system and service availability as per the Service Level Agreement (SLA). Experience at Office 365 (EXO), Hybrid model.

UDS

Helpdesk Technician

- Provided technical support and troubleshooting for hardware, software, and network issues within the airport terminal.
- Assisted airport staff and passengers with IT-related inquiries and problems, ensuring minimal disruption to operations.
